

INVESTOR PITCH — SPEAKER GUIDE

SkillPassport AI

The Gateway to the Global Developer Ecosystem

DURATION 12–15 minutes

THEME “Building the Trust Infrastructure for the Global Developer Economy”

PRESENTATION FLOW

Hook → Problem → Solution → Business → Vision → Investment

Timing Overview

SPEAKER	SEGMENT	SLIDES	TIME
Chandana M N	Introduction & Hook	1	2 min
Chandrashekar V	Problem Statement	2 – 3	2.5 min
Chetana	Solution & Core Idea	4 – 5	3 min
Pavitra J	Value Proposition & Market	6 – 8	3 min
Lohith R C	Vision, Closing & Investment Ask	9 – 10	3–4 min

SLIDE 1 Title — SkillPassport AI**ON SCREEN —** Slide 1

- SkillPassport AI
- The Gateway to the Global Developer Ecosystem
- Visual: a developer surrounded by GitHub, LinkedIn, AWS, LeetCode, universities, companies, and investors — all disconnected

SCRIPT

Good morning, respected investors, mentors, and everyone present here.

Imagine you're one of the world's best software developers. You have built amazing projects. You contribute to open source. You have solved thousands of coding problems. You have deployed real applications. You have completed internships.

But when you apply for a job... you're still asked for one thing... 'Please upload your resume.'

Years of work... reduced to a two-page document.

Today, every developer's journey is scattered across multiple platforms. GitHub stores code. LinkedIn stores professional history. Coding platforms measure problem-solving. Cloud platforms host projects. Universities maintain academic records. Recruiters manually visit every one of these platforms to understand a single candidate.

The problem isn't a lack of talent. The problem is the lack of trust and connection between all these platforms.

That's exactly why we created SkillPassport AI.

HAND-OFF

"To understand why this problem is much bigger than recruitment alone, I invite Chandrashekar to explain the current challenges faced by developers and companies."

SPEAKER 2

Chandrashekar V

Problem Statement

2.5 min

SLIDE 2 The Broken Developer Ecosystem

ON SCREEN — Slide 2

- Large ecosystem visual — disconnected platforms

SCRIPT

Today's developer ecosystem is highly fragmented.

A software engineer uses GitHub for source code. LinkedIn for networking. LeetCode for coding practice. AWS or Vercel for deployment. Separate portfolio websites. Recruitment portals for jobs. Startup platforms for funding.

Every platform captures only one part of a developer's professional journey. This fragmentation creates problems for everyone.

Developers repeatedly prove their skills on every platform. Companies spend valuable time verifying projects, resumes, coding ability, and technical experience. Universities struggle to showcase the true capabilities of their students. Investors often cannot judge whether startup founders possess the technical skills to execute their ideas.

The industry has evolved... but the way we evaluate technical talent has not. We don't have a trusted identity for developers. We only have fragmented pieces.

SLIDE 3 Problem Summary

STAKEHOLDER	CURRENT PAIN POINTS
Developer	Multiple Profiles Multiple Portfolios Multiple Verifications
Company	Resume Screening Manual Verification Hiring Delays
University	Limited Visibility
Investor	No Technical Trust Layer

HAND-OFF

"So how do we solve this? Instead of creating another recruitment platform, we decided to build something much bigger. Chetana will now introduce our solution."

SPEAKER 3

Chetana*Solution & Core Idea*

⌚ 3 min

SLIDE 4 SkillPassport AI — Gateway to the Global Developer Ecosystem

ON SCREEN — Slide 4

- Visual: everything connected through SkillPassport

SCRIPT

SkillPassport AI is not another recruitment platform. It is the infrastructure that connects the entire developer ecosystem.

Instead of replacing GitHub, LinkedIn, coding platforms, cloud providers, or universities... we connect them.

Every verified contribution made by a developer becomes part of one continuously growing professional identity. Every project... every deployment... every internship... every certification... every technical challenge... strengthens the developer's Skill Passport.

Companies no longer evaluate resumes alone. They evaluate verified work. Universities showcase industry-ready graduates. Investors discover technically capable founders. Developers build careers instead of simply searching for jobs.

SLIDE 5 Platform Ecosystem**SkillPassport AI**

Developers · Companies · Universities · Investors · Cloud Providers · Mentors

CONTINUE

Everything we build revolves around one idea... professional identity built through real contributions. Every feature exists for one purpose: to create, strengthen, or utilize a developer's verified identity.

HAND-OFF

"Now that you've seen our vision, Pavitra will explain how this translates into real business value and our future roadmap."

SLIDE 6 Why SkillPassport Wins**SCRIPT**

Our competitive advantage is not one feature. It is the ecosystem.

Existing platforms solve one problem. GitHub manages repositories. LinkedIn manages networking. Cloud providers host applications. Recruitment platforms connect jobs.

But none of them connects the entire developer journey. SkillPassport becomes the trusted layer connecting all of them.

SLIDE 7 Future Vision

Proof of Skill

Skill Economy

Time Capsule Portfolio

CONTINUE

Our long-term innovations make the platform even stronger. We introduce the Proof of Skill Protocol, where developers earn verifiable professional credibility through real-world work rather than static resumes.

We introduce the Skill Economy, where companies publish real engineering problems instead of traditional job descriptions, allowing developers to build careers by continuously solving meaningful challenges.

Finally, our Time Capsule Portfolio preserves every verified contribution made throughout a developer's career, allowing recruiters to understand not only what a developer knows today but also how they have evolved over time.

SLIDE 8 Revenue Streams

\$ Enterprise Recruitment	\$ Premium Developer Plans
\$ Marketplace Commission	\$ University Partnerships
\$ Cloud Marketplace	\$ Sponsored Challenges

CONTINUE

Our business model is diversified, creating multiple recurring revenue streams while ensuring that every participant in the ecosystem benefits from the platform's growth.

HAND-OFF

"Finally, I'd like to invite Lohith to conclude our vision and explain why we believe SkillPassport AI represents the future of technical talent."

SPEAKER 5

Lohith R C

Vision • Closing • Investment Ask

🕒 3–4 min

SLIDE 9 Future**SCRIPT**

Technology has changed the way software is built. But it has not changed the way technical talent is trusted.

We believe the future belongs to verified professional identity.

Just as GitHub became the home of source code... LinkedIn became the home of professional networking... we envision SkillPassport becoming the trusted identity for technical talent across the world.

SLIDE 10 Vision

One Identity

One Ecosystem

Unlimited Opportunities

CONTINUE

We are not building another recruitment platform. We are building the infrastructure for the global developer economy.

Where developers build. Companies discover. Universities validate. Investors connect. Cloud providers empower innovation. Every project. Every contribution. Every deployment. Every achievement. Becomes a trusted opportunity.

INVESTMENT ASK

Today, we are seeking strategic partners and investment to build the first phase of SkillPassport AI.

Our initial focus is simple: build the trusted identity layer for developers. Validate it with companies. Then expand into the broader ecosystem.

We are not asking you to invest in another recruitment platform. We are inviting you to invest in the future infrastructure of technical talent.

FINAL LINE — PAUSE BEFORE SAYING

“Because in the future, people won't trust resumes. They'll trust Proof of Skill. Thank you.”

3	Current Fragmented Ecosystem
4	Our Solution
5	Connected Ecosystem Diagram
6	Why We're Different
7	Future Vision (PoS, Skill Economy, Time Capsule)
8	Business Model & Roadmap
9	Vision & Investment Ask
10	Thank You / Q&A

Before You Present: Anticipate the Toughest Question

If these are experienced investors, expect the toughest question to be:

“What are you building first?”

Don't answer with the full ecosystem. Instead, say:

“Our Phase 1 focuses on a verified developer identity platform with project verification, Proof of Skill foundations, and recruiter discovery. The broader ecosystem — Skill Economy, Time Capsule, cloud marketplace, and startup network — is our long-term roadmap.”

That answer shows discipline. Investors generally prefer founders who can clearly distinguish between the MVP and the 10-year vision.
